

## Product Release

### Natural Gas Dispenser Separator

The Black Powder Natural Gas Dispenser Separator removes Black Powder contamination before fueling engines for mobile and stationary equipment, furnaces and power plant applications.

- Removes ferrous and non-ferrous Black Powder contamination to sub-micron levels protecting valves, meters and compressor seals.
- Cleans natural gas to improve combustion and burn fewer emissions.
- Easily cleaned and returned to service.
- Requires a yearly PM with minimal consumable components such as flange gaskets.
- Designed to fit a variety of inlet, outlet and flange sizes in order to fit your system needs.
- Black Powder Solutions Magnetic Separator Rods have a life expectancy of 16+ years.

Black Powder contamination is primarily comprised of iron sulfides and oxides.
